

PSC & KVSC Govt. Degree College

Department of Botany

BEST PRACTICES

Field Trips

- field trip is a favourite part of both teachers and students who are keen on learning and discovering
- Field trips are a popular method carried out for students to introduce the concepts, experiences, and ideas that cannot be given in a classroom environment.
- Discovering the natural world is a highly important perspective in the educational sector.

We have been going out to many forests and nurseries along with students and providing them with visual environments. We have made it a part of every year curriculum.

Certificate Course

Certificate course helps children to have a self business.

These courses give basic knowledge on various subjects that help students to opt for higher courses in the same or related fields

These courses are also preferred for career enhancement purposes

Certification courses have become necessary for a person to stand ahead of others in competition.

Certification Course helps an individual to showcase his competency, commitment for the profession, build expertise in his professional subject area, and helps with job advancement

The curriculum of these courses is designed in such a way that it includes all practical skills to be used at the workplace

A Certification Course speaks about the skills and talents of an individual in his professional subject area. It provides him official and public recognition and good employment opportunities.

We have been teaching certificate course on **NURSERY MANAGEMENT AND VARIOUS ARTIFICIAL PROPAGATION METHODS** since 2011.

Many students who are poor in studies have used this platform and learnt skills and benefitted in their life.

Certificate Course on Nursery Management
